MODERN TAKES CARE OF YOUR FORKLIFT TIRE NEEDS

The condition of your forklift's tires is critical to your facility's safety, equipment costs, and regulatory compliance. Delaying the replacement of your equipment's tires can cause **serious OSHA fines and liability risk**.

WHEN IS IT TIME TO REPLACE YOUR TIRES?

- Tread distance from the manufacturer's nameplate falls below an inch.
- Visible damage: chunking, tearing, splitting, and cracking of the rubber.
- Tread is no longer visible.
- Flat spots due to uneven alignment or sudden stops.

VIRTUAL FLEET EVALUATION:

Email us pictures of your tires for a free fleet evaluation. Our certified and trained technicians can replace and press tires both in the shop and on the road.
